Título: The Spanish Network for Gaia Science Exploitation

Nombre (Autor que presenta): Francesca

Apellidos (Autor que presenta): Figueras

Apellidos y nombre de los autores: C. Jordi, X. Luri and J. Torra on behalf of the REG Executive Committee and Gaia-UB team.

Resumen:

The “Red Española de Explotación Científica de Gaia” (REG) continues to intensify its activities facing the imminent publication of the first and second Gaia Data Releases (September, 2016 and summer 2017, respectively). The network, supported by the MINECO under contract “Acciones de dinamización, Redes de Excelencia (2016-2017)”, has as major priority the task to coordinate and support the collective activities developed by its more than 150 members. At present, REG plays a prominent role in the preparation of the Spanish community for the use of the Gaia Data Archive (a task being leaded by the Spanish teams), in the work to exploit the Gaia-ESO survey collected during the last four years and in supporting the preparation of the Science Case and Survey Plan for WEAVE, the new multi-object spectrograph for the WHT at Canary Islands (commissioning, 2018). These activities will be described together with the schedule of future national and international science meetings and the outreach activities being organized for the First and Second Data Release.
